**Kirti M. Doongursee College of  
Arts, Science and Commerce  
(AUTONOMOUS)**

Affiliated to

**UNIVERSITY OF MUMBAI**

Syllabus for  
Program: Master of Science  
Course: M.SC. – PART 1  
Subject: Zoology

Choice Based Credit System (CBCS)  
with effect from  
Academic Year 2022-2023

## PEDAGOGY

PSZO101 is 'Non-chordates', a study of Comparative functional anatomy, paleontology and phylogeny as well as all internal structures and various systems of non-chordates like protostomes and deuterostomes. It also assists in understanding of the anatomical similarities and differences of various systems. Practical aspects of functional anatomy and phylogeny could be undertaken through observation of various systems at laboratory level, field visits, constructing phylogenetic tree and making fossil casts.

PSZO102 consists of 'Developmental biology I' which explains reproductive biology, molecular biology, genetics and morphology of non-chordates. The basic concepts of the reproductive process – fertilization could be taught considering the mechanism in relation to its molecular aspect. Applications of reproductive biology could be dealt with by taking various examples of economic importance. Practical aspects of developmental biology could be undertaken through observation of life cycles of various organisms that can be cultured in the laboratory as per the ethical permission granted so that learners can understand the theoretical approach in a much better way.

The course PSZO103 'Genetics and Evolution' will help the learner for conceptual understanding of the basic genetic principles along with genetic evolution and the impact it creates at the genome and molecular level with major phenotypic variation. Short basic experiments on drosophila or nematodes or video clips can be shown by the concerned teacher while clearing the concept of the topics. Teachers are expected to show the video clips or fossil photographs for the understanding of the topic. A visit to museum, institute or the archeological site to study fossils can be organised.

The course PSZO104 'Frontiers in Zoology' is prepared to introduce emerging interdisciplinary scientific fields such as Astrobiology and Chronobiology. For understanding of medical imaging techniques visits to medical diagnostic centers should be organized. Teachers are expected to elucidate the scope of medical diagnostic techniques as career options. Guest lectures of the experts could be arranged, who can provide additional insights to these aspects. Documentaries and videos based on climate change and global warming can be effectively used to provide in-depth knowledge to the learners. Case studies could be supplemented to understand the intensity of climatic change and global warming and its impact. The learners can be made aware about emotions, stress and associated health problems through the interaction with clinical psychologist and through videos of experts dealing the subject.

In course PSZO201 'Chordates', an attempt has been made to inform the students the basic comparative, functional morphology and phylogeny of chordates. Learners will be able to acquire the knowledge of evolutionary progression of primitive nonchordate to protochordates. They will also learn basic taxonomy of chordates, the beautiful world of biodiversity and through this they can enter in to the field of nature conservation or strategize to spread knowledge for future generations. This endeavor will be possible by utilizing various teaching methodologies such as use of model, charts and available specimens. This goal will to be achieved by the use of audio visuals, virtual dissections and observation of animals in their natural habitat through field visits.

In course PSZO202 'Developmental Biology II', generalized account of reproductive systems in chordates has been included to provide knowledge of reproductive system .This can be

taught through virtual dissection. It also deals with physiology of reproduction where documentaries and videos can be shown to students for effective learning. Students can be given micro projects for in-depth knowledge or a visit to reproductive research centres could be organized. It can also be taught through case study and guest lectures.

PSZO203 'Biochemistry and Biotechnology' unit comprehends chemical and physicochemical processes which occur within living cell or organisms and utilization of biological processes for industrial and other purposes through the genetic manipulation of microorganisms respectively. The unit can be made more explicable by observing available video clips and visits on open day programs to the institutions like CIFE, NIRRH, ACTREC, KEM etc. The learners can also achieve an additional knowledge on the topic through attending free on- line courses on the <https://www.coursera.org>

PSZO204 'Research methodology' unit is framed to help the learners build a strong foundation for pursuing research. Visit to relevant websites should be undertaken to make them aware of different avenues for acquiring research grants, scholarships and funding and also to gain valuable insights about various model organisms and their applications in research. Methods of data management and analysis can be explained using different online and offline softwares to enable the learners to acquire these skill sets. The practical should be organized such that learners can be trained to manage large data sets generated via multiple observations, arrange them in a proper format and present them in relevant graphs/charts by adopting a hands-on in silico approach. Visits may be organized to nearby research institutions having CPCSEA certified Animal House and labs housing various model organisms so that students can acquire an in-depth knowledge on these topics. Guest lectures by leading research scientists may also be arranged to enrich the learners and stimulate their interest in forging a career in this field in the future.

## M. Sc. Part 1: Semester I (Theory)

### Paper 1: KPSZO22101: Non-Chordates

#### Unit 1: Digestion and Excretion

(15L)

##### Objectives

- To understand functional anatomy, differences and similarities of digestive and excretory systems of non-chordates.

##### Desired Outcome

- The learner will be able to differentiate anatomical and physiological modifications of digestive and excretory systems of non-chordates like Protostomes and Deuterostomes.

#### 1.1 General organization of digestive systems of Protostomes (Annelids, Arthropods and Molluscs) and Deuterostomes (Echinoderms and Hemichordates)

#### 1.2 Digestive Systems with Special emphasis on the organs or glands of :

##### 1.2.1 Annelids

- Clamworm – Denticles or Paragnaths, Jaws

##### 1.2.2 Arthropods

- Prawn: Buccal cavity, Cardiac and Pyloric stomach, Hepatopancreas

##### 1.2.3 Molluscs

- *Pila*: Odontophore, Sub-radular organ, Radula, Oesophageal pouches, Cardiac and Pyloric chambers, Salivary gland, Hepatopancreas

##### 1.2.4 Echinoderms

- Starfish: Cardiac and Pyloric stomach, Intestinal Caeca, Digestive glands

##### 1.2.5 Hemichordates

- Balanoglossus: Buccal Diverticulum, Digestive Pharynx, Post-branchial canal, Hepatic and post-hepatic regions

#### 1.3 General organization of excretory systems of Protostomes (Annelids, Arthropods and Molluscs) and Deuterostomes (Echinoderms and Hemichordates)

#### 1.4 Excretory Systems with Special emphasis on the organs/structures or glands of:

##### 1.4.1 Annelids

- Clamworm: Coiled Nephridia

##### 1.4.2 Arthropods

- Prawn: Antennal glands or Green glands or Maxillary glands, Bladder, Renal sac

##### 1.4.3 Molluscs

- *Pila*: Organ of Bojanus, anterior Renal chamber, posterior Renal chamber

##### 1.4.4 Echinoderms

- Starfish: Water Vascular System, Coelomocytes, Intestinal caeca

##### 1.4.5 Hemichordates

- Balanoglossus: Glomerulus or Proboscis gland

## Unit 2: Respiration and Circulation

(15L)

### Objectives

- To understand anatomical differences and similarities of respiratory and circulatory systems in non-chordates.
- To understand physiological processes in non-chordates.

### Desired Outcome

- The learner will be able to differentiate anatomical and physiological modification in respiratory and circulatory systems of non-chordates like Protostomes and Deuterostomes.

### 2.1 General organization of respiratory systems of Protostomes (Annelids, Arthropods and Molluscs) and Deuterostomes (Echinoderms and Hemichordates)

#### 2.2 Respiratory Systems with Special emphasis on the organs/structures or glands of:

##### 2.2.1 Annelids

- Clamworm: Parapodia, Body wall

##### 2.2.2 Arthropods

- Prawn: Branchiostegites, Branchiae, Epipodite

##### 2.2.3 Molluscs

- *Pila*: Ctenidium, Pulmonary sac

##### 2.2.4 Echinoderms

- Starfish: Dermal papulae, Tube Feet

##### 2.2.5 Hemichordates

- *Balanoglossus*: Gill slits, Branchial sac, Gill pores

### 2.3 General organization of circulatory systems of Protostomes (Annelids, Arthropods and Molluscs) and Deuterostomes (Echinoderms and Hemichordates)

#### 2.4 Circulatory systems with special emphasis on the organs/ structures or glands of:

##### 2.4.1 Annelids

- Clamworm: Dorsal blood vessel, Ventral blood vessel, Transverse vessels

##### 2.4.2 Arthropods

- Prawn: Heart and Blood lacunae

##### 2.4.3 Molluscs

- *Pila*: Pericardium, Heart

##### 2.4.4 Echinoderms

- Starfish: Perihæmal sinuses, Axial gland

##### 2.4.5 Hemichordates

- *Balanoglossus*: Central Sinus (Heart), Dorsal vessel, Ventral vessel

## Unit 3: Nervous System, Chemical Co-ordination and Reproductive System

(15L)

### Objectives

- To compare nervous systems and chemical co-ordination in non-chordates.
- To understand similarities and differences in the reproductive systems of non-chordates.

### Desired Outcome

- The learner will be able to differentiate anatomical and physiological modifications of nervous systems and chemical co-ordination of non-chordates.

- *The learner will be able to differentiate modifications of reproductive systems of non-chordates.*

### **3.1 General organization of Nervous systems & Chemical Co-ordination in Protostomes (Annelids, Arthropods and Molluscs) and Deuterostomes (Echinoderms and Hemichordates)**

#### **3.2 Nervous system & Chemical Co-ordination with special emphasis on the organs/structures or glands of:**

##### **3.2.1 Annelids**

- Clamworm: Corpora pedunculata, Giant fibre, Circumpharyngeal ganglion, Peristomal cirri, Nuchal organ, pigmented Retinal cells

##### **3.2.2 Arthropods**

- Prawn: Brain, Circum-oesophageal commissure, Compound eyes, Chromatophore, Statocysts, Tactile setae, Olfactory setae, Tangoreceptors, Chemoreceptors, Proprioceptors, Sinus gland X organ complex, Y organ

##### **3.2.3 Molluscs**

- *Pila*: Cerebral Ganglia, Buccal Ganglia, Pleuro-pedal Ganglionic Mass, Supra-intestinal Ganglion, Visceral Ganglion, Osphradium, Tentacles, Statocysts, Eyes, Mechanoreceptors, Photoreceptors, Temperature receptors, Chemoreceptors

##### **3.2.4 Echinoderms**

- Starfish: Ectoneural nervous system, Langer's nerve, Eyes, Terminal tentacles, Neurosecretory cells

##### **3.2.5 Hemichordates**

- *Balanoglossus*: Epidermal Plexus, Preoral ciliary organ, Neurosecretory cells

### **3.3 General organization of reproductive systems in Protostomes (Annelids, Arthropods and Molluscs) and Deuterostomes (Echinoderms and Hemichordates)**

#### **3.4 Reproductive systems with special emphasis on the organs/structures or glands in:**

##### **3.4.1 Annelids**

- Clam worm: Gonads – Testes and Ovaries (Temporary)

##### **3.4.2 Arthropods**

- Prawn: Male – Testes, Vasa deferentia, Vasiculae seminalis; Female – Ovaries, Oviducts

##### **3.4.3 Molluscs**

- *Pila*: Male – Testes, Vasa efferentia, Vasa deferens, Vasicula seminalis, Hypobranchial glands; Female – Ovary, Oviduct, Receptaculum seminis, Uterus, Vagina, Hypobranchial gland

##### **3.4.4 Echinoderms**

- Starfish: Male / Female gonads

##### **3.4.5 Hemichordates**

- *Balanoglossus*: Saccular gonads

## Unit 4: Paleontology and Phylogeny

(15L)

### Objectives

- To understand evolution of non-chordates by studying their fossils found in Indian sub-continent.
- To understand phylogeny of non-chordates.

### Desired Outcome

- The learner will be able to understand the evolution of non-chordates and their phylogenetic relationships by means of paleontological evidences.

### 4.1 Fossils of:

4.1.1 **Annelids:** *Serpula* and *Glomerula* spp. found in South India

4.1.2 **Arthropods:** Trilobites found in Kashmir, Insects trapped in amber found in Western India

4.1.3 **Molluscs:** Molluscs fossils found in Kutchh, Chhattisgarh and Jammu – *Palmerella kutchensis*, *Cimomia forbesi*, Lamellidens

4.1.4 **Echinodermata:** *Gongrochanus* spp. found in South India, Echnoid fossils found in India.

4.1.5 **Hemichordata:** Graptolite fossils

### 4.2 Phylogenetic affinities of Annelida, Arthropoda, Mollusca, Echinodermata and Hemichordata

4.2.1 Phylogenetic relationships of Trochophore larva

4.2.2 Similarities and differences between Annelids and Molluscs

4.2.3 Phylogeny of Arthropods – Monophyletic theory and polyphyletic theory

4.2.4 Phylogeny of Echinoderms – Asterozoan hypothesis and Cryptosyringid hypothesis

4.2.5 Affinities of Annelida with Hemichordata

4.2.6 Affinities of Echinodermata with Hemichordata

### 4.3 Construction of Phylogenetic Tree

4.3.1 Genetic distance

4.3.2 Rooting trees

### 4.4 Phylogenetic Tree Building Methods

#### 4.4.1 Distance-Based Methods:

- o UPGMA Method
- o Neighbour Joining Method (NJ)
- o Weighted Neighbour-Joining (Weighbour)
- o Fitch-Margoliash (FM) and Minimum Evolution (ME) Methods

#### 4.4.2 Character-based Methods:

- o Maximum parsimony (MP)
- o Maximum Likelihood (ML)

## Paper 2: KPSZO22102: Developmental Biology – I

### UNIT 1 – Fertilization and Early Development in Non-chordates

(15 L)

#### Objectives

- To introduce learners to the concept, mechanism and molecular events of fertilization in non-chordates
- To introduce the concept of germ layers and coelom formation.

#### Desired Outcome

- The learner will understand the mechanism of fertilization and its molecular events in non-chordates.
- The learner will appreciate the process of formation of germ layers and coelom in animals and understand the difference in these processes between Protostomes and Deuterostomes.

#### 1.1 Concept and Mechanism of Fertilization

1.1.1 Types of reproduction – Asexual and sexual

1.1.2 Fertilization – Concept and types

1.1.3 Mechanism of fertilization

- Capacitation of sperm
- Recognition of sperm and egg
- Acrosome reaction
- Activation of egg
- Fusion of egg and sperm cell membrane
- Amphimixis

#### 1.2 Molecular Events of Fertilization

1.2.1 Species specific recognition of gametes – Fertilizin and antifertilizin interaction, Binding protein

1.2.2 Prevention of polyspermy – Fast and slow block

1.2.3 Calcium as initiator of cortical granule reaction

1.2.4 Activation of egg metabolism with respect to Sea urchin

#### 1.3 Formation of Germ Layers and Coelom Formation

1.3.1 Post Fertilization events: Overall view of Cleavage, Blastulation, Gastrulation

1.3.2 Formation of Germ layers – Diploblastic, Triploblastic

1.3.3 Coelom formation in Protostomes and Deuterostomes

### Unit 2: Basic concepts of embryonic development in non-chordates

(15L)

#### Objectives:

- To introduce basic concepts of embryonic development and embryogenesis.
- To understand therapeutic applications of stem cells.

#### Desired outcome:

- Learners would understand basic concepts and aspects of embryogenesis and stem cell therapy.

2.1 Fate map and cell lineages: potency and commitment

2.2 Competence and induction

2.3 Mosaic and regulative development

2.4 Cell specification:

2.4.1 Autonomous specification

2.4.2 Conditional specification

2.4.3 Syncytial specification

### **Unit 3: Early Development in non-chordates**

**(15L)**

#### **Objectives:**

- *To introduce the learners about the process of early development and differences in the pattern of development in non-chordates.*
- *To help learners understand specific gene regulation during development.*

#### **Desired Outcome**

- *Learners will understand the mechanism of early development and able to correlate the various differences observed in the pattern of embryonic development in non-chordates.*
- *Learners will understand the role of certain genes in early development*

#### **3.1 Development of *Caenorhabditis elegans***

3.1.1 Pattern of cleavage

3.1.2 Anterior-posterior axis formation

3.1.3 Dorsal-Ventral axis formation

3.1.4 Cell specification (Autonomous and Conditional)

3.1.5 Process of gastrulation

#### **3.2 Early Development in *Drosophila melanogaster*:**

3.2.1 Pattern of cleavage

3.2.2 Blastulation

3.2.3 Process of gastrulation

3.2.4 Anterior-posterior pattern formation by morphogenetic protein gradient

3.2.5 Dorsal-ventral pattern formation by morphogenetic protein gradient

3.2.6 Patterns of homeotic gene expression: *Homeo* selector gene complexes

(*Hom-C*, homeotic gene complex) – Antennapedia and bithorax complexes and their functional domains, Realistor genes: *distal less* and *wingless* genes

### **Unit 4: Special Aspects in Reproduction and Development in non-chordates**

**(15L)**

#### **Objectives:**

- *To understand diversities in reproduction and development in non-chordates.*
- *To understand the mechanism of regeneration*
- *To help learners to relate applications of developmental biology with forensics and IPM*

#### **Desired outcome:**

- *Learners will acquire knowledge about the diversities in reproduction and development in invertebrates and the process of regeneration in lower animals.*
- *Learners will understand how principles of developmental biology can be applied in forensics and IPM*

#### 4.1 Sexual Reproduction in Protozoa

- Conjugation in *Paramecium sp.*
- Syngamy in flagellates

#### 4.2 Metagenesis in *Obelia sp.*

#### 4.3 Polyembryony in *Fasciola sp.*

#### 4.4 Regeneration in *Hydra* (Morphallactic) and Planaria (Totipotency)

#### 4.5 Parthenogenesis in Aphids

#### **4.6 Metamorphosis in insects – Indirect Development**

##### 4.6.1 Types of insect metamorphosis

##### 4.6.2 Eversion and differentiation of imaginal disc

##### 4.6.3 Hormonal control of insect metamorphosis

##### 4.6.4 Study of life cycle of Blow fly-applications in forensics

##### 4.6.5 Larval forms of non-chordates: Amphiblastula larva (Porifera), Planula (Coelenterata), Echinopluteus (Echinodermata) and Tornaria (Hemichordata)

#### 4.7 Pheromones in invertebrates and their role as sex attractants and in Integrated Pest Management (IPM)

## Paper 3: KPSZO22103: Genetics and Evolution

### Unit 1: Introduction to evolutionary genetics:

(15L)

#### Objectives:

- To develop in learners the understanding of genes, genomes in evolution.
- To comprehend the pattern of genetic relatedness between all species.
- To understand the contribution of genetic variation in phenotypic expression

#### Desired outcome:

- The learners will understand the genetic analysis at the gene, genome and population level.
- The learner would realize the flow of genetic information and complex networking of genes in biological system leading to major phenotypic changes.

### 1.1 Cytochrome 'c'

- 1.1.1 Structure of Cytochrome 'c' and couple cytochrome 'c'
- 1.1.2 Cytochrome 'c' in eukaryotes. Example Primates
- 1.1.3 Cox gene
- 1.1.4 Molecular basis of haemoglobin gene structure. Haemoglobin as a model of evolution

### 1.2 Sex Determination and Evolution of Sex Chromosome

- 1.2.1 Theory of evolution of sex chromosome
- 1.2.2 Evolution of sex chromosomes from autosomes
- 1.2.3 Biology of Y chromosome
- 1.2.4 Molecular level of sex determination in mammals
- 1.2.5 Sex based gene expression
- 1.2.6 T6sRNA

### 1.3 Cytoplasmic Inheritance/Extra-nuclear Inheritance

- 1.3.1 Introduction – human mitochondrial genetics
- 1.3.2 Paternal and maternal mtDNA inheritance in humans
- 1.3.3 mtDNA mutations and human diseases
- 1.3.4 Salient feature of cytoplasmic inheritance

### 1.4 Selfish Gene

- 1.4.1 Introduction and definition
- 1.4.2 Individual altruism and genetic egoism
- 1.4.3 Green beard effect

### Unit 2: Molecular Genetics

(15L)

#### Objectives:

- To get acquainted with applications of genes in modern science and population genetics.
- To give in-depth knowledge of biological processes through molecular mechanisms.

#### Desired Outcome:

- The learner will understand the molecular processes that occur in and between the cells.

- *The learner will gain insight in most significant molecular and cell based methods used to expand the understanding of modern Biology.*

## **2.1 Gene Library**

- 2.1.1 Molecular analysis of gene and gene products
- 2.1.2 Types – Genomic Library, cDNA Library
- 2.1.3 Construction of genomic library – human antibody gene library
- 2.1.4 Applications of gene library

## **2.2 Types of Genes: Definition**

- Multigenes
- Repeated genes
- Single copy gene
- House-keeping gene (constitutive gene)
- Luxury gene (non-constitutive gene)
- Pseudogene
- Jumping gene (Transposons)
- Overlapping gene
- Structural gene
- Processed gene
- Split gene
- Regulatory gene

### **2.2.1 Multi-gene Families and Types:**

- a) Split Genes or Interrupted genes
  - Introduction
  - Structure of split genes
  - Discovery and theory of split genes
  - Evolution of split genes
- b) Pseudogenes
- c) Selfish gene

### **2.2.2 Overlapping Gene**

## **2.3 Mapping units**

- 2.3.1 Types –genetic mapping and physical mapping
- 2.3.2 Detection of linkages
- 2.3.3 Construction of linkage maps in diploids and their characteristics
- 2.3.4 Co-efficient of coincidence
- 2.3.5 Outline of other types of gene mapping

## **2.4 Gene cloning**

- 2.4.1 Definition and strategies of gene cloning
- 2.4.2 Techniques in gene cloning
- 2.4.3 Applications of gene cloning in DNA analysis in research

## **2.5 Population genetics**

- 2.5.1 Population genetics in DNA typing

- 2.5.2 Mutation – Selection balance
- 2.5.3 Parallelism between random drift and inbreeding

### **Unit 3: Evolution – Anthropology**

**(15L)**

#### **Objective:**

- *To give an insight to students about the expression, perpetuation and adaptations of animals in varied environment during the process of evolution*

#### **Desired Outcome:**

- *Learner will be able to gain knowledge of altruism, co-evolution and the racial distribution of animals in evolutionary time scale*

### **3.1 Racial distribution of Primates and *Homo sapiens***

- 3.1.1 Racial distribution of primates
  - Distribution of Prosimians (Lemurs, Lorises, Galagos)
  - Distribution of Anthropoids (Monkeys and Apes)
- 3.1.2 Divergence of *Homo sapiens* from Anthropoid

### **3.2 Racial distribution of *Homo sapiens***

- 3.2.1 Biological races in humans
  - Caucasoid (White) race
  - Negroid (Black) race
  - Capoid (Bushmen/Hottentots) race
  - Mongoloid (Oriental / Amerindian) race
  - Australoid (Australian Aborigine and Papuan) race
- 3.2.2 Human genetic diversity protein-based polymorphism (Blood groups, Alu polymorphism), craniometrics

### **3.3 Importance of Human Genetic Biodiversity**

- 3.3.1 Applications – Anthropological, Medical, Cultural
- 3.3.2 Parasites and human co-evolution
- 3.3.3 Ectoparasite's co-evolution with humans (Head Louse, Scabies, Mite)
- 3.3.4 Endoparasites co-evolution with humans (Liver fluke, Tapeworm, *Ascaris*, Sickle cell Individuals as an example of co-evolution with malarial parasite)

### **3.4 Altruism and Evolution**

- 3.4.1 Altruism – Intra-species and Interspecies, Cooperation and its evolution in human
- 3.4.2 Altruism and evolution in domesticated wild animals
- 3.4.3 Group selection and kin selection
- 3.4.4 Domestication and behavioral changes

### **3.5 Hybrid Evolution**

- 3.5.1 Natural Hybrids – Origin and evolution of animal hybrids, Insects, Snails, Fish, Frog, Lizard
- 3.5.2 Hybrid Speciation
- 3.5.3 Artificial Hybrids – Hybrid optimization – Bee Colony
- 3.5.4 Artificial cells in hybrids to create
  - Dzo

- Mule
- Hinny

- Liger
- Wholpin
- Leopon
- Zorse

## Unit 4: Evolution & Fossils

(15L)

### Objectives:

- *To help students to solve biological problems that impact our lives and to understand similarities and differences between human and other species with respect to body form, behaviour, adaptation, distribution pattern and physiology.*
- *To understand learner that fossil records provide history of earth as they occur in a particular order.*
- *To impart the learner with knowledge of preserving endangered species by the technique of biomaterial banking, assisted reproductive technology and frozen zoo.*

### Desired Outcome:

- *The learner will be able to apply evolutionary principles to research and understand aspects of evolution.*
- *Learner will be acquainted with techniques of dating fossils and formation of fossils.*
- *The learner will understand the concept of frozen zoo and will foster the need of hour for conservation of endangered species.*

### 4.1 Human evolution

- 4.1.1 Human evolutionary history and placing humans on tree of life
- 4.1.2 Genomics and humanness; current issues in human evolution
- 4.1.3 Brief Accounts of *Parapithecus spp.*, *Propliopithecus spp.*, *Dryopithecus spp.*, *Ramapithecus spp.*, *Australopithecus spp.*, *Kenyanthropus spp.*, *Homo spp.*, Neanderthal, Cromagnon and Modern man
- 4.1.4 Concept of neutral evolution, molecular divergence and molecular clock

### 4.2 Fossil dating

- 4.2.1 Geological timescale – Eras, Periods and Epochs
- 4.2.2 Major events in evolutionary time scale
- 4.2.3 Significance of fossils and fossilization
- 4.2.4 Fossil dating – Types: Absolute and Relative Dating
- 4.2.5 Process of C-14 Carbon dating

### 4.3 Frozen zoo

- 4.3.1 Concept of frozen zoo to save endangered species
- 4.3.2 Techniques to create offspring from cells of endangered species, nuclear transfer, mixing cells, creating sperms and eggs
- 4.3.3 Current status of frozen zoo

## Paper 4: KPSZO22104: Frontiers in Zoology

### Unit 1: Astrobiology and Chronobiology

(15L)

#### Objectives:

- *To introduce recent interdisciplinary scientific fields to the learners.*
- *To inculcate interest for interdisciplinary research among the learners.*

#### Desired outcome:

- *Learners will get the introductory knowledge of emerging areas correlated with Zoology.*
- *Learners will understand the different types of biological clocks and their importance.*

1.1 General aspects of Astrobiology, status of research in astrobiology and future perspectives, factors determining habitability on planets; extremophiles

1.2 Bio-signatures of life in exoplanet atmosphere

1.3 Search for life on Mars; search for extra-terrestrial intelligence

1.4 Introduction to Chronobiology – Definition and meaning

#### 1.5 Biological rhythms

1.5.1 Introduction

1.5.2 Types

- Circadian rhythms
- Tidal rhythms
- Lunar rhythms
- Semilunar rhythms
- Circannual rhythms

1.6 Structure of Biological Clock in Insects and Vertebrates; biological clock function

#### 1.7 Relevance of Biological Clocks for Human Welfare

1.7.1 Chronomedicine

1.7.2 Chronotherapy

1.8 Molecular mechanisms controlling the circadian rhythm (Noble Prize winning work, 2017)

### Unit 2: Modern Techniques in Medical Field

(15L)

#### Objectives:

- *To provide the basic knowledge of different modern techniques used in medical field.*
- *To provide information of applications of biomedical techniques.*

#### Desired outcome:

- *Learner would be able to explain the basic principles, applications of the major imaging and DNA bar coding techniques.*

## **2.1 Physical aspects of medical imaging**

- 2.1.1 Laser beam in Biology and Medical field
- 2.1.2 Medical lasers (Carbon Dioxide Laser, Nd: YAG Laser)
- 2.1.3 Applications of lasers in therapy and diagnosis.

## **2.2 Principle and applications of major medical imaging techniques**

- 2.2.1 Radiography
- 2.2.2 Echocardiography (2D and 3D Echo)
- 2.2.3 Computed Tomography Scan (CT scan)
- 2.2.4 Magnetic Resonance Imaging (MRI)

2.3 Radioisotope Imaging: Introduction and applications

2.4 DNA bar coding technique and its applications

## **2.5 Molecular Cytogenetic Techniques and their Applications**

- 2.5.1 Fluorescence *in situ* Hybridization (FISH)
- 2.5.2 Genomic *in situ* Hybridization (GISH)
- 2.5.3 Flow cytometry
- 2.5.4 Automated karyotyping
- 2.5.5 Chromosome painting

## **Unit 3: Biological Psychology and Neurobiology of Stress and Emotion**

**(15L)**

### ***Objectives:***

- *To give learners the basic knowledge of emotions, stress and associated health problems.*
- *To introduce learners to the brain regions that forms the basis of emotions.*

### ***Desired outcome:***

- *Learner will get acquainted with brain regions that form the basis of emotions and stress.*
- *Learner will also understand the health problems caused due to prolong emotion and stress on the body.*

3.1 Introduction and general features of emotions

3.2 Neuronal basis of emotion

### **3.3 Types of emotions – Definition and management**

- Fear
- Frustration
- Joy / Happiness
- Sadness
- Embarrassment
- Guilt
- Shame
- Anger
- Love
- Inspiration

### 3.4 Measurement of emotions

- Self-report
- Behavioral observations
- Physiological measure

### 3.5 Role of brain regions in emotions

- Limbic system
- Amygdala
- Cortex
- Hypothalamus
- Midbrain Periaqueductal Grey
- Neurochemicals involved in emotions

3.6 Concept of Stress, Measurement of stress, Characterising stress – Signs of stress, Types of stressors

3.7 Stress and the Hypothalamus-Pituitary-Adrenal Axis (HPA Axis)

3.8 Remedial measures to combat psychological stress and negative emotions

## Unit 4: Climate Change and Sustainability

(15L)

### Objectives:

- *To provide the information about the causes of climatic change.*
- *To make the student aware of various national and international initiatives on climate change.*

### Desired outcome:

- *The learner will understand current challenges of climatic changes and environmental issues.*
- *Learner will understand the importance of the sustainable development.*

### 4.1 Climate change

- 4.1.1 Introduction
- 4.1.2 Indicator species of climate change
- 4.1.3 Vulnerability and adaptations

### 4.2 Greenhouse effect

- 4.2.1 Greenhouse gases
- 4.2.2 Increase in greenhouse gas concentrations
- 4.2.3 Global warming potential of greenhouse gases

4.3 Intergovernmental Panel on Climate Change [IPCC]: Objectives and functioning

### 4.4 United Nations Framework Convention on Climate Change (UNFCCC) – Salient Features and Objectives

- 4.4.1 Kyoto protocol
- 4.4.2 Doha Amendment
- 4.4.3 Emission trading / Carbon Trading

### 4.5 Sustainable development

#### 4.5.1 Introduction and goals

4.5.2 Sustainable habitat – Green building, *Griha* rating norms

**4.6 Green Audit – Introduction and Types:**

- Energy audit
- Waste disposal audit
- Water audit
- Carbon audit

4.7 Impact of climate change on terrestrial and aquatic organisms

**4.8 Case Studies on Climatic Change and Global Warming**

- Kerala floods
- Impact of highway and road construction on animal survival
- Impact of urbanization: Dhaka – Bangladesh

## M. Sc. Part 1: Semester I Practical 1

### **KPSZOP22101: Non-Chordates**

1. Study of digestive systems of clamworm, prawn, *Pila*.
2. Study of digestive systems of starfish, *Balanoglossus*.
3. Study of excretory systems of clamworm, prawn, *Pila*.
4. Study of excretory systems of starfish, *Balanoglossus*.
5. Study of larval forms of Annelids, Arthropods, Molluscs with reference to phylogeny.
6. Study of larval forms of Echinoderms with reference to phylogeny.
7. Study of nervous systems of clamworm, prawn, *Pila*.
8. Study of nervous systems of starfish and *Balanoglossus*.
9. Study of male reproductive systems of clamworm, prawn, *Pila*.
10. Study of male reproductive systems starfish, *Balanoglossus*.
11. Study of female reproductive systems of clamworm, prawn, *Pila*.
12. Study of female reproductive systems starfish, *Balanoglossus*.
13. A. Study of Fossils:
  - a. Annelids: *Serpula* and *Glomerula* spp.
  - b. Arthropods: Trilobites, Insects trapped in amber
  - c. Molluscs: *Palmerella kutchensis*, *Cimomia forbesi*, LamellidensB. Study of Fossils:
  - d. Echinodermata: *Gongrochanus* spp., *Goniocidaris*
  - e. Hemichordata: Graptolite fossils
14. Construction of phylogenetic tree.
15. Making of fossil casts with *Shaadu* Clay / Muddy soil\*.
16. Field visit to observe invertebrates in their natural habitat and accordingly the modifications of various systems.
17. Field visit to study fossils to the places such as museums, Institutions, quarries, archeological sites etc.

**\*Note: Plaster of Paris and Plasticine Modelling clay should not be used to make fossil casts.**

## Practical 2: KPSZOP22101: Developmental Biology – I

1. To culture *Paramecium* to study conjugation and binary fission under the microscope.
2. To observe development of *C. elegans*.
3. To culture *Drosophila* to study its life cycle.
4. To observe stages of *Tribolium* or *Sitophilus* to understand indirect development in animals.
5. To study germ layers:
  - Diploblastic – T.S. of body wall of sponges and cnidarians (coelenterates)
  - Triploblastic acoelomate – T.S. of body wall of Platyhelminthes
  - Triploblastic pseudocoelomate – T.S. of body wall of *Ascaris*
  - Triploblastic coelomate – T. S. of body wall of earthworm
6. To study gemmule in sponge.
7. To study larvae of non-chordates:
  - Porifera – Amphiblastula
  - Cnidaria (Coelenterata) – Planula
  - Annelida and Molluscs – Trochophore
  - Mollusca – Glochidium
  - Crustacea
    - Nauplius
    - Zoea
    - Mysis
    - Megalopa
  - Echinodermata
    - Auricularia
    - Echiopluteus
  - Hemichordata – Tornaria
8. To study Life cycle of Butterfly / Moth (Insecta).

**Observation should be done by using Permanent slides/ Photos/Charts/ Preserved specimens/Animal models for studying the developmental aspects.**

### **Practical 3: KPSZOP22102: Genetics and Evolution**

1. To Isolate DNA from the given blood sample.
2. To study the Kappa particles in *Paramecium* cultured in laboratory.
3. To study the maternal effects in *Drosophila* due to induced environmental changes.
4. To study the Avian brood parasitism in cuckoo, crow, Asian koel, Shiny cowbird.
5. To study Haemoglobin of domesticated dogs, cats, cattles with the help of comparative protein sequence charts using bioinformatics tools.
6. Study of Altruism, reciprocal altruism in Vampire bat, thumping of ground gene in Rabbit.
7. To study different types of fossils:
  - a. Body Fossils – A wall of large dinosaur bones, *Turritella* snail shells from the Miocene age (Photograph)
  - b. Mould & casts – Ammonite, Clam shell
  - c. Per mineralization or petrification fossils – Per mineralized Dinosaur Bone (Photograph), permineralized Fern Stripe (Photograph).
8. To study cloning in India – eg. Garima – Assamese Buffalo, Noori – Pashmina goat.
9. Study of syndromes – Cockeye syndrome (CS), Proteus syndrome, Muenke syndrome.
10. Problems on gene mapping and mitotic index.

#### **Practical 4: KPSZOP22102: Frontiers in Zoology**

1. Identification of photographs with respect to chronobiology.
  - a. Structure of biological clock in insects
  - b. Structure of biological clock in vertebrates
2. Identification of photographs of different imaging techniques.
3. Determination of concentration of iron as a pollutant from sample / sample solution by – Redox titration or spectrophotometric method.
4. Detection of heavy metals from given sample:            a) Zinc    b) Lead c) Copper.
5. To estimate the amount of dust (particulate matter) deposition on the leaves of roadside plants.
6. Study of animals as indicators for climate change and global warming
  - a. Green turtle
  - b. Birds – Sparrow
  - c. Polar bear
  - d. Coral reef
  - e. Butterflies
7. Study of gross anatomical regions of brain involved in stress and emotion.
8. Environment Audit report (Green Audit / Review of EIA of a Selected Area)
9. Visit to nearby bar coding laboratory / imaging center and submission of report.
10. Assignment or report submission on pulse rate after stress.

## M. Sc. Part 1: Semester II (Theory)

### Paper 1: KPSZO22201: Chordates

#### Unit 1: Protochordates and Agnatha

(15L)

##### **Objectives:**

- To equip learners with the knowledge of evolutionary progression of Protochordates.
- To familiarize learner with the origin, morphology and phylogeny of the Protochordates.

##### **Desired outcome:**

- Learners would be equipped with the understanding of morphology and phylogeny of Protochordates.

#### 1.1 Protochordates

- 1.1.1 Origin and ancestry of Protochordates, similarities and differences with Invertebrates and Chordates
- 1.1.2 Comparison of characteristics between subphyla Urochordates and Cephalochordates

#### 1.2 Urochordates

- 1.2.1 Life history of *Herdmania* and its phylogenetic affinities

#### 1.3 Cephalochordates

- 1.3.1 General features and phylogenetic affinities
- 1.3.2 Life history of *Branchiostoma*

#### 1.4 Ostracoderm

- 1.4.1 Salient features and biological significance
- 1.4.2 Interrelationship and affinities with fish

#### 1.5 Cyclostomes

- 1.5.1 Resemblance with Cephalochordates, Vertebrates and differences from Fishes
- 1.5.2 Life history of *Petromyzon*

#### Unit 2: Phylogeny of Chordates

(15L)

##### **Objectives:**

- To provide learners with the knowledge of evolutionary progression of Protochordates.
- To familiarize learner with the origin, morphology and phylogeny of the Protochordates.

##### **Desired outcome:**

- Learners would be equipped with the understanding of morphology and phylogeny of Protochordates.

#### 2.1 Ancestry of Chordates

#### 2.2 Pisces

- 2.2.1 General characters of Dipnoi and affinities with Fishes, Elasmobranchs and Amphibia

- 2.2.2 Origin of air bladder and its relationship with tetrapod lungs
- 2.2.3 Deep sea adaptations of fishes
- 2.2.4 Origin of fins

### **2.3 Amphibia**

- 2.3.1 Origin of Tetrapods
- 2.3.2 Pedomorphosis
- 2.3.3 Adaptive radiation in amphibians Lepospondyli and Lissamphibia

### **2.4 Reptilia**

- 2.4.1 Origin of Reptiles and affinities with Amphibia
- 2.4.2 Terrestrial adaptations in Reptiles

### **2.5 Aves**

- 2.5.1 Origin of Birds and affinities with Reptiles
- 2.5.2 Adaptive radiation in Birds – Ratitae (Flightless Birds) and Carinatae (Flying Birds)
- 2.5.3 Origin of Flight – Theory of Cursorial and Arboreal origin

### **2.6 Mammalia**

- 2.6.1 Origin of Mammals
- 2.6.2 Phylogeny of terrestrial and aquatic mammals

## **Unit 3: Functional and Comparative Anatomy of Chordates**

**(15L)**

### **Objectives:**

- *To equip learners with the knowledge of evolutionary progression of chordates.*
- *To familiarize learner with the origin, morphology and phylogeny of the chordates.*

### **Desired outcome:**

- *Learners would understand evolution, morphology and phylogeny of chordates.*

### **3.1 Comparative Anatomy of:**

- 3.1.1 Chondrocranium
- 3.1.2 Splanchnocranium
- 3.1.3 Skull in different Vertebrates

### **3.2 Evolution and Comparative Anatomy of Excretory System of Chordates**

- 3.2.1 Evolutionary development of Kidney
  - Archinephros
  - Pronephros
  - Mesonephros
  - Metanephros

### **3.3 Comparative Anatomy of Nervous System in Vertebrates**

- 3.3.1 Brain
- 3.3.2 Sense organs – Eyes and Ears

### **3.4 Comparative Anatomy of Respiration**

- 3.4.1 Gills, Skin and Lungs

### **3.5 Circulation: Heart and Aortic Arches**

3.6 Male and female reproductive and urinary ducts of Vertebrates (Cyclostomes, Teleost, Elasmobranchs, Amphibia, Reptilia, Aves and Mammalia)

#### **Unit 4: Assorted Topics on Chordates**

**(15L)**

##### **Objectives:**

- *To introduce learners with some interesting topics of the chordates.*

##### **Desired outcome:**

- *Learners would obtain additional knowledge of diverse characteristics of various chordates*

4.1 Retrogressive metamorphosis in Ascidians

#### **4.2 Pisces**

- Evolutionary significance Crossopterygians, Placoderms
- Migration
- Lateral line sense organ and electric organs

4.3 **Amphibia** – Evolutionary significance of Labyrinthodonts

#### **4.4 Reptilia**

- Evolutionary significance of Dinosaurs
- Venom apparatus and biting mechanism in snakes

#### **4.5 Aves**

- Migration
- Flight adaptations

#### **4.6 Mammalia**

- Dentition in mammals
- Habitat diversification
- Walking gait: Plantigrade, Digitigrade and Unguligrade
- Comparative account of Jaw suspension

## Paper 2: KPSZO22202 Developmental Biology – II

### Unit 1: Generalized Account of Reproductive Systems in Chordates

(15L)

#### Objective:

- To introduce to the learner the generalized account of reproductive systems and accessory structures in chordates.

#### Desired outcome:

- The learner will gain knowledge of reproductive systems in chordates.

#### 1.1 Reproductive system

- Urochordata – Tunicate
- Cephalochordata – *Amphioxus*
- Cyclostomata – *Petromyzon*
- Pisces – Catfish
- Amphibia – Frog
- Reptilia – Lizard
- Aves – Pigeon
- Mammalia – Human

#### 1.2 Accessory Reproductive Glands – Human

### Unit 2: Physiology of Reproduction

(15L)

#### Objective:

- To acquaint the learner with physiology of reproduction in chordates.

#### Desired outcome:

- The learners will get an idea of reproductive physiology in chordates.

#### 2.1 Biochemistry of semen – Fish, Frog, Snake, Human.

- 2.1.1 Sperm capacitation, decapacitation – molecular mechanism and significance

#### 2.2 Ovarian leuteinization and mammary gland differentiation – human

#### 2.3 Pheromones – Pisces, Amphibia, Reptilia, Aves and Mammalia

#### 2.4 Courtship behaviour in – Pisces, Amphibia, Reptilia, Aves, Mammalia

### Unit 3: Developmental Biology – Germ Cells, Stem Cells and Induced Breeding

(15L)

#### Objectives:

- To introduce to the learner the germ cell migration in chordates.
- To acquaint the learner with details of stem cells.

#### Desired outcome:

- The learner shall comprehend details of germ cell migration and understand the importance of stem cells.

#### 3.1 Introduction to germ cells

Germ cell migration in Zebrafish, Frogs, Lizard, Chick and Mouse

### **3.2 Stem cells –**

- 3.2.1 Embryonic stem cells, Induced Pluripotent stem cells, Adult stem cells
- 3.2.2 Regeneration Therapy – Cardiac, bone and neuronal regeneration
- 3.2.3 Cryopreservation of stem cells – Concept, tools, techniques and application

### 3.3 Induced breeding in fish – technique and applications

## **Unit 4: Animal Development – Impact of Environment and Evolution**

**(15L)**

### **Objective:**

- *To introduce to the learner the impact of environment on development and its evolutionary aspects.*

### **Desired outcome:**

- *The learner will be acquainted with environmental impact on development and evolution of animals.*

### **4.1 Environmental Cues and Impact on Development**

- Predator Induced Polyphenisms – Amphibian
- Temperature and Sex – Fish, Turtle and Alligator

### **4.2 Teratogenesis**

- Alcohol, Retinoic acid, Endocrine disruptors – Diethylstilbestrol, Plastics – Nonylphenol, Bisphenol A and Heavy metals as teratogens

### **4.3 Developmental constraints on evolution – physical, morphogenetic and phyletic**

- 4.3.1** Modularity of development – Example – Duffy blood group substance and Stickleback fish

### **4.4 Aging and Senescence – Causes, Consequences, and Therapeutics**

- 4.4.1** Environmental and epigenetic causes of aging – Plastics, Pesticides, Heavy metals

### **4.5 Promoting Longevity: Role of telomerase: an overview**

## Paper 3: KPSZO22203: Biochemistry and Biotechnology

### Unit 1: Fundamentals of Biochemistry

(15L)

#### Objective:

- To provide learners an in-depth knowledge of the fundamentals of chemical foundations of biomolecules and their interactions.

#### Desired Outcomes:

- Learners will have in-depth understanding of the fundamentals of chemical basis of life.
- Learners will have knowledge of the structures, interactions, and importance of complex biomolecules and their significance in living system.

#### 1.1 Water as the Basic Molecule of Life

- 1.1.1 Structure of atoms, molecules and chemical bonds
- 1.1.2 Molecular structure and solvent properties of water, tetrahedral geometry, hydrogen bond, thermal properties of water and their biological significance
- 1.1.3 Ionization of water, Ion product of water ( $K_w$ ), Concept of  $pH$ , Dissociation of weak acids and weak bases, Henderson-Hasselbalch Equation, Titration curves of strong and weak acids, concept of buffer, buffers in biological systems

#### 1.2 Biological Macromolecules

- 1.2.1 Central role of Carbon
- 1.2.2 Common ring structure, Chirality, and Isomerization in biomolecules
- 1.2.3 Composition, structure of monomers and polymers, functions of carbohydrates, lipids, proteins, nucleic acids and vitamins

#### 1.3 Interactions of Macromolecules

- 1.3.1 Stability of Proteins and Nucleic Acids; Stabilizing Interactions such as *Vander Waals*, Electrostatic, Hydrogen Bonding, Hydrophobic Interactions
- 1.3.2 Conformation of proteins: Ramachandran plot, secondary structure, domains, motif and folds, hydropathy index of amino acids, isoelectric point ( $p_i$ ) of proteins

#### 1.4 Complex biomolecules

- 1.4.1 Glycoproteins: blood group determinants
- 1.4.2 Complex Lipids: Phospholipids, Sphingolipids, Gangliosides, Sterols and Waxes
- 1.4.3 Lipoproteins: classification and functions of chylomicrons, VLDL, LDL, HDL, and free fatty acid-albumin complex

### Unit 2: Metabolism and Metabolic Pathways

(15L)

#### Objective:

- To provide the learners knowledge of the metabolism of various biomolecules and the importance and interrelationships of metabolic pathways in the biological systems.

#### Desired Outcomes:

- Learners' will have in-depth understanding of the bioenergetics and metabolic pathways of various biomolecules.
- Learners will gain knowledge of the regulatory mechanisms underlying various metabolic pathways.

## 2.1 Biochemical Thermodynamics

- 2.1.1 Laws of thermodynamics, free energy, entropy, enthalpy, exergonic and endergonic reactions
- 2.1.2 Biological oxidation: Electron transport chain in mitochondria; oxidative phosphorylation – mechanism, uncoupling of oxidative phosphorylation and its significance
- 2.1.3 Free radicals, Antioxidants and Antioxidant system

## 2.2 Carbohydrate and Lipid Metabolism

- 2.2.1 Glycolysis and its energetics
- 2.2.2 Gluconeogenesis: Reaction sequence from pyruvate, gluconeogenesis from amino acids, glycerol, propionate and lactate
- 2.2.3 Glycogen metabolism: Glycogenesis, Glycogenolysis
- 2.2.4 Significance of the pathways: Hexose Monophosphate (HMP) Shunt as a multifunctional pathway; uronic acid pathway; glyoxalate cycle
- 2.2.5 Fatty acid metabolism: Oxidation of saturated even and odd carbon atom, and unsaturated fatty acids, metabolism of cholesterol

## 2.3 Regulation of Metabolism

- 2.3.1 Regulation of metabolic flux by genetic mechanisms: Control of enzyme synthesis, constitutive and inducible enzymes; induction and repression of enzymes (lac operon and trp operon)
- 2.3.2 Regulation of metabolism by extracellular signals: nutrient supply, nutrient transport, endocrine control, neural control

## 2.4 Amino acid and Nucleic acid Metabolism

- 2.4.1 Nitrogen metabolism: Protein turnover, amino acid pool, nitrogen balance
- 2.4.2 Metabolism of Amino acids: Transamination, Deamination, Urea cycle
- 2.4.3 Formation of amino acids from Pyruvate, TCA cycle intermediates, Acetyl CoA
- 2.4.4 Nucleic Acid metabolism: *De novo* synthesis: synthesis of purine and pyrimidine nucleotides; Salvage Pathway; Catabolism of purine and pyrimidine nucleotides

## Unit 3: Processes and Techniques in Biotechnology

(15L)

### Objectives:

- *To provide the learners thorough knowledge on the genome organization, gene expression and its control in prokaryotes and eukaryotes.*
- *To acquaint learners with the basic tools and techniques used in Biotechnology.*

### Desired Outcomes:

- *Learners will be able to understand the processes for harnessing the potentials of living systems for betterment of mankind.*
- *Learners will have an understanding of the processes and techniques used in development of biotechnology products.*

## 3.1 Genome Organization

- 3.1.1 Organization of genome in prokaryotes and eukaryotes, C-value paradox and genome size
- 3.1.2 Complexity of viral, bacterial and eukaryotic genomes, Cot curves, repetitive and non-repetitive DNA sequences

### 3.2 DNA replication, Gene expression in prokaryotes and eukaryotes

- 3.2.1 Molecular model of DNA replication
- 3.2.2 Transcription and translation in prokaryotes
- 3.2.3 Transcription and translation in eukaryotes

### 3.3 Control of gene expression in Prokaryotes & Eukaryotes

- 3.3.1 Small regulatory RNAs, small nuclear ribonucleoproteins (snRNPs), Transcription level control, RNA processing, Translational level control, post-translational control
- 3.3.2 Gene silencing, miRNA, RNA silencing pathways and DNA methylation

### 3.4 Methods in Biotechnology

- 3.4.1 Cloning using plasmid pUC18, pUC19, detection of recombinants by blue-white screening, cloning in bacteriophage, cosmid, BAC and YAC vectors
- 3.4.2 Chromosome walking, RAPD, AFLP, Microarrays

## Unit 4: Applications of Biotechnology

(15L)

### Objective:

- To provide learners the knowledge on the applications of biotechnology in various fields.

### Desired outcome:

- Learners will gain knowledge on the application of biotechnology in industries, medicines, agriculture and environment.

### 4.1 Industrial Biotechnology

- 4.1.1 Microbial fermentation, Microbial growth kinetics, Design of a fermenter, Organisms used in large scale fermentation.
- 4.1.2 Production of antibiotics – Cephalosporin, erythromycin; amino acids – proline, glutamate; vitamins – cyanocobalamine, riboflavin; Aspartame and Taxol

### 4.2 Medical Biotechnology: Molecular approaches in diagnosis and treatment

- 4.2.1 Peptide vaccines: synthetic drugs (engineered proteins)
- 4.2.2 Genetic immunization: Antisense DNA, Therapeutic ribozymes
- 4.2.3 Anti-idiotypic vaccine for cancer treatment
- 4.2.4 Monoclonal antibodies (mAbs) and their therapeutic applications
- 4.2.5 HIV therapeutic agents
- 4.2.6 Production of biopharmaceuticals from transgenic animals – Human Tissue Plasminogen Activator (hTPA) and  $\alpha$ -1Antitrypsin (AAT)
- 4.2.7 Pharmacogenomics and Nutrigenomics: An overview and applications

### 4.3 Agricultural Biotechnology

- 4.3.1 Plant Tissue culture methods–Broad outline and applications of Pollen culture & Protoplast culture
- 4.3.2 *Bacillus thuringiensis* based bio-pesticides, genetic engineering of herbicide resistance trait in crops, genetic engineering of  $\beta$ -carotene biosynthetic pathway in golden rice
- 4.3.3 Genetic engineering of biological nitrogen fixation (Nitrogen as ecluster and hydrogenase genes), Genetic engineering drought/salinity tolerance trait in crops

#### **4.4 Environmental Biotechnology**

4.4.1 Effluent treatment, Bioremediation, phytoremediation, Biosensors, Biofuels

4.4.2 Cartagena protocol on biosafety – General features with respect to objectives, precautionary principle and live modified organisms (LMO)

## **Paper 4: KPSZO22204: Research Methodology**

### **Unit 1: Principles of Scientific Research**

**(15L)**

#### **Objectives:**

- *To acquaint learners with the principles of scientific research and methods of conducting scientific enquiry.*
- *To inculcate scientific temperament and research aptitude among the learners.*

#### **Desired outcome:**

- *Learner will be able to formulate research problem and concept research design.*
- *Learner will be able to execute the research problem.*

### **1.1 Basic concepts of research**

#### 1.1.1 Definition

#### 1.1.2 Characteristics of research (controlled, rigorous, systematic, valid and verifiable, empirical and critical)

#### 1.1.3 Objectives of research

#### 1.1.4 Types of research:

- a) Pure and applied
- b) Structured and unstructured
- c) Descriptive, correlational, explanatory, exploratory, historical, comparative and experimental

### **1.2 Formulating research problem**

#### 1.2.1 Reviewing literature: Using library, computerized searches, evaluating literature

#### 1.2.2 Developing a research problem: Importance, sources, considerations, steps, defining a problem, formulate objectives

#### 1.2.3 Identifying variables: Introduction, types of variables, measurement scales

#### 1.2.4 Hypothesis: Definition, function, characteristics, types (H<sub>0</sub>, H<sub>A</sub>), Principles of hypothesis, framing hypothesis, errors in hypothesis, research question versus research hypothesis, hypothesis versus non-hypothesis research

### **1.3 Research design**

#### 1.3.1 Definition and purpose

#### 1.3.2 Characteristics of good research design

#### 1.3.3 Sampling strategy and sampling size determination, eliminating extraneous variables

#### 1.3.4 Types of study design: study designs in quantitative research (cross-sectional, before and after, longitudinal, retrospective, prospective, retrospective-prospective, experimental, non-experimental, quasi-experimental)

### **Unit 2: Data Management and Analysis**

**(15L)**

#### **Objectives:**

- *To introduce learners to various statistical tools for analysis of research data.*
- *To familiarize learners with the in-silico approach for data management.*

#### **Desired outcome:**

- *The learner will be able to develop skill set for organisation and effective presentation of data.*

- *The learner will be able to choose correct statistical test.*
- *The learner will be able to perform statistical analysis indifferent fields of research using various computer programs.*

## **2.1 Methods of data collection**

- 2.1.1 Primary sources
- 2.1.2 Secondary sources

## **2.2 Data Classification and Presentation**

- 2.2.1 Classification of data (Geographical, Chronological, Qualitative, Quantitative)
- 2.2.2 Tabulation of data (one-way table, two-way table, complex table)
- 2.2.3 Type of charts (Line, Column, Scatter plot, Box plot, Heat Map)

## **2.3 Concepts of Measurements**

- 2.3.1 Univariate (standard deviation, variance, quartiles)
- 2.3.2 Bivariate (correlation and regression)
- 2.3.3 Multivariate (ANOVA: one-way, two-way)
- 2.3.4 Level of significance and p-value
- 2.3.5 Normal distribution, Skewness, Kurtosis, Outliers

## **2.4 Testing of Hypothesis**

- 2.4.1 Null hypothesis, Alternative hypothesis
- 2.4.2 Type 1 and Type 2 Errors
- 2.4.3 Testing of Hypothesis (single population mean, two population means)
- 2.4.4 One-tailed and Two-tailed tests

## **2.5 Parametric and Non-parametric tests**

- 2.5.1 Parametric tests: t test, z test, F test
- 2.5.2 Non-parametric tests: Chi-square test, Mann-Whitney test, Kruskal-Wallis test, Friedman Test, Wilcoxon signed-rank test

## **Unit 3: Scientific Communication**

**(15L)**

### **Objectives:**

- *To enable learners to develop skills for effective research communication.*
- *To enable learners to publish research paper in journals with good impact factors.*

### **Desired outcome:**

- *The learner will be able to get an insight of scientific communication documentation and will become familiar with good scientific journals.*

## **3.1 Research planning**

- 3.1.1 Project Proposal and research funding agencies – Research grants, scholarships and funding (CSIR, DBT, DST, DST- INSPIRE Fellowship, ICMR, INSA, BRNS, MoEFCC, UGC-RFSMS, Fulbright Fellowships for Indian students, Lady Tata Memorial Trust, EPA, Bill and Melinda Gates Foundation, Wellcome Trust, Erasmus Mundus)
- 3.1.2 Use of reference management software (MS Word / Zotero / Mendeley)
- 3.1.3 Scientific writing –Thesis and Dissertation

## **3.2 Documentation for approval from Institutional Animal Ethics Committee (IAEC) and**

## **Institutional Biosafety Committee (IBSC)**

- 3.2.1 Documents for registration, renewal and reconstitution of IAEC as per CPCSEA guidelines
- 3.2.2 Proposal layout for permission from IAEC for use of animals in research
- 3.2.3 Proposal layout based on recombinant DNA safety guidelines from IBSC
- 3.2.4 Proposal layout for use of transgenic animals in research

## **3.3 Publications and Research Journals**

- 3.3.1 Types of research journals
- 3.3.2 Impact factors of Journals
- 3.3.3 Predatory Journals
- 3.3.4 Review process - benefits and drawbacks of single blind, double blind and open peer review process
- 3.3.5 Understanding “h – index” and “i10 – index”
- 3.3.6 SCOPUS, Google Scholar, Web of Science
- 3.3.7 Process to obtain ISSN and ISBN

## **Unit 4: Model organisms and their applications**

**(15L)**

### **Objectives:**

- *To introduce to learners the key species which are used as model organisms in research.*
- *To acquaint the learners with special techniques developed for studying these model organisms.*
- *To make them aware of the contributions of model organisms to basic biology, genetics, development and diseases.*

### **Desired outcome:**

- *The learners will be able to understand the special features of different animals that have made them useful as a model system.*
- *The learners will become familiar with the specific applications of model organisms for various biological processes.*
- *The learners will be able to appreciate how experimentation with these organisms has enhanced the understanding of the basis of human diseases.*

### **4.1 Introduction:** Concept key features and importance of model organisms

### **4.2 Earthworm**

- 4.2.1 Biology and genome
- 4.2.2 Model for studies on regeneration

### **4.3 *Caenorhabditis elegans***

- 4.3.1 Body plan of the worm, genetics, genome, cultivation, advantages and limitations
- 4.3.2 Techniques used for genetic modification, Mutant characterization, discovery of RNAi

### **4.4 *Daphnia sp.***

- 4.4.1 Genome, epigenetic phenotypic variation
- 4.4.2 Advantage and limitations
- 4.4.3 Model for studies in toxicology

#### **4.5 *Drosophila melanogaster***

4.5.1 Genome, advantages and limitations

4.5.2 Model for cytogenetics, development, neuroscience, human diseases and therapeutic drug discovery

#### **4.6 *Danio rerio* (Zebra fish)**

4.6.1 Genome, advantages and limitations

4.6.2 Insights on embryology, ageing and toxicology

#### **4.7 *Mus musculus* (Mouse)**

4.7.1 Genomics, advantages and limitations

4.7.2 Model for studies on physiology, development, ageing, human diseases (Cancer and Diabetes) and behaviour research

4.7.3 Transgenic and germ line transgenic mouse models, genetically engineered mouse models (GEMMs): Knock-In and Knock-out mouse models

## **M. Sc. Part 1: Semester II**

### **Practical 1**

#### **KPSZOP22201: Chordates**

1. Museum specimens / Photographs / Pictures / Slides:
  - i. Protochordates: Study of *Doliolum*, *Herdmania*, *Ascidia*, *Botryllus*
  - ii. Adaptive radiation in Reptiles-Turtles, Crocodile, Tuatara, Snakes and Lizards
  - iii. Adaptive radiation in Mammals – Talpa (mole), Tarsius, Armadillo, Camel and Sperm whale
2. Comparative anatomy of digestive system in vertebrates.
3. Comparative study of Pelvic and Pectoral girdle in vertebrates. -
4. Types of jaw suspension in vertebrates- Autodiastylic, Holostylic, Amphistylic and Autostylic.
5. Types of vertebrae – Acoelous, Procoelus, Opisthocoelus, Amphicoelus, Amphiplatins, Heterocoelus, Axis and atlas vertebrae.
6. Phylogenetic analysis of phenotypic characters from given data in chordates.
7. Construction of phylogenetic tree with given ancestors.
8. Pigeon – Study / Virtual dissection of
  - i. Flight muscles
  - ii. Digestive system
  - iii. Respiratory system
  - iv. Circulatory system
  - v. Excretory system
  - vi. Reproductive system – male and female
9. Field visit to National park / Sanctuary / Museum / Zoo or any other suitable ecosystem to study vertebrates.

## **Practical 2 KPSZOP22201: Developmental Biology II**

1. Identification of fish developmental stages—egg, larva, juvenile (fry, fingerling and adult).
2. Measurement of fish ova diameter using oculometer.
3. Preparation of histological slides – fish ovary / testis.
4. Study of metamorphosis in Amphibia.
5. Histology of male and female accessory reproductive glands – Human – Prostate gland, Bulbourethral gland and placenta [Permanent slides].
6. Analysis of testicular extract/ semen – Fish / Chicken / Goat.
  - i. pH, Viscosity, Agglutination.
  - ii. Sperm count and motility – Fish / Chicken / Goat.
  - iii. Hypo-osmotic swelling of sperm – Normal / Abnormal.
7. Study of stem cells from chick embryo – staining and identification of cells.

### **Practical 3 KPSZOP22202: Biochemistry and Biotechnology**

1. Titration curve of weak acid.
2. Titration curve of strong acid.
3. Quantitative estimation of proteins from the given sample using Bradford method.
4. Determination of glucose by Benedict's quantitative reagent (Titrimetric method).
5. Isolation and determination of glycogen in the given tissue (liver / skeletal muscle / kidney) by Anthrone method.
6. Determination of saponification value of fats/oils.
7. Estimation of the number of bacteria in the given culture by nephelometry.
8. Preparation of beads by immobilization of yeast cells in calcium alginate.
9. Monitoring of Invertase activity in bioreactor column of immobilized yeast cells by DNSA method.
10. Restriction digestion of the given DNA sample and separation of the fragments by agarose gel electrophoresis.
11. Southern blotting technique (assembly of the sandwich/ mechanical blotting).
12. Determination of effect of minimal and enriched media on growth curves of *E. coli*.

#### **Practical 4 KPSZOP22202: Research methodology**

1. Write a proposal to obtain permission for use of model animal in research from IAEC. (*Print copy to be submitted during practical exam and assessed by viva.*)
2. Write a grant proposal to a funding agency. (*Print copy to be submitted during practical exam and assessed by viva.*)
3. Evaluation of journal / research paper metrics:
  - a. Impact factor (from the given data)
  - b. h – index (from the given data)
  - c. Percent plagiarism (using online tools)
4. Interpret the given data (qualitative / quantitative) and represent as graph / chart.
5. Problems based on parametric tests and non-parametric tests. (to be performed using MS Excel / SPSS / Minitab)
6. Calculation of correlation co-efficient and plotting regression line from given biometry data using MS Excel / SPSS / Minitab.
7. Calculation of diversity indices (Shannon and Simpson) using MS Excel / PAST3.
8. Descriptive / Inferential statistics using online statistical tests – GraphPad Prism
9. <https://www.graphpad.com/data-analysis-resource-center/>
10. To study the characteristics and applications of animal models used in pre-clinical research.
11. Small animal models: Rat, Transgenic mice, Nude mice, Hamster.
12. Large animal models: Rabbit, *Cynomolgus macaque*, Rhesus macaque, Vervet / African green monkey, Marmoset, Chimpanzee.
13. Visit to an animal house in a research institution and submission of report.

## **Evaluation Scheme for First Year (PG) under AUTONOMY**

### **I. Internal Evaluation for Theory Courses – 40 Marks**

Continuous Internal Assessment 1 (Seminar Presentations) – 40 Marks

### **II. External Examination for Theory Courses – 60 Marks**

Duration: 2 Hours

Theory question paper pattern:

All questions are compulsory.

<b>Question</b>	<b>Based on</b>	<b>Options</b>	<b>Marks</b>
Q.1	Unit I	Descriptive (Q1 A OR Q1 A AND Q1 B OR Q.1 B)	12
Q.2	Unit II	Descriptive (Q2 A OR Q2 A AND Q2 B OR Q.2 B)	12
Q.3	Unit III	Descriptive (Q3 A OR Q3 A AND Q3 B OR Q.3 B)	12
Q.4	Unit IV	Descriptive (Q4 A OR Q4 A AND Q4 B OR Q.4 B)	12
Q.5	Unit I , II, III & IV	Short notes (Attempt any 4 out of 8)	12

- All questions shall be compulsory with internal choice within the questions.
- Each Question may be sub-divided into sub questions as a, b, c, d, etc. & the allocation of Marks depends on the weightage of the topic.

### **III. Practical Examination**

- Each core subject carries 50 Marks (30 marks External + 20 marks Internal)

<b>Sr. No.</b>	<b>Postgraduate Practical Internal Evaluation:</b>	<b>Marks</b>
1	Short Experiment/Field Trip/Excursion/Industrial Visit Report	15
2	Journal	5

<b>Sr. No.</b>	<b>Postgraduate Practical External Evaluation:</b>	<b>Marks</b>
1	Experiment/s	25
2	Viva	5

- Duration: 2 Hours for each practical course.
- Minimum 80% practical from each core subjects are required to be completed.
- Certified Journal is compulsory for appearing at the time of Practical Exam
