Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion on these financial statements based on our audit.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists.

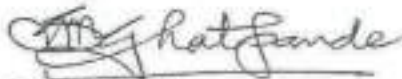

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

We conducted our audit in accordance with the Auditing & Assurance Standards issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to issue our report.

An audit includes

- a) performing procedures and examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. The procedures selected depend on auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the institution's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances.
- b) evaluating the appropriateness of accounting policies used and reasonableness of the accounting estimates made by the management, as well as evaluating the overall presentation of the financial statements.

We conducted our audit in accordance with the Auditing & Assurance Standards issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to issue our report.

An audit includes

- a) performing procedures and examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. The procedures selected depend on auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the institution's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances.
- b) evaluating the appropriateness of accounting policies used and reasonableness of the accounting estimates made by the management, as well as evaluating the overall presentation of the financial statements.
