- 1. Please provide the syllabus well in advance, not just two or three weeks before exams, to give students enough preparation time.
- 2. Overall, the teaching is effective. However, when the syllabus is incomplete, the pace of teaching becomes too fast. Please aim to complete the syllabus in advance to maintain a suitable teaching pace.
- There needs to be a major improvement in

- Everything is fine but we did not get a place for our practice like camera and room for film making so that we understood what to do and what not to do etc and staff are still a little inoperative.
- No suggestions.
- Professor should be appointed for every subject from the start of syllabus and the syllabus should be completed before exam rather than teaching at last moment
- N/A
- Syllabus is career oriented
- Abx
- teacher should change their teaching method because most off the teacher just came in the classroom and read their pdf file and the reading session goes and nothing ,this reading thing every student can do at their home .teachers explain the reading lines but their explanation is not so good indirectly it is poor it doesn't interact or effective for students .the explanation doesn't get to the students .teachers doesn't explain in easy and simple language .each and every topic is new for the students because of this reason the good student and other students doesn't attend the lecture so the attendance gets low and some of the teacher do fail the student because of the attendance that's why students attend the lecture for only the attendance not for learning about the subject . there many things about the teachers .
- No there is no suggestions because teachers are very greatly complete all syllabus

- Few teachers take great efforts in teaching while others forget the mental well-being of students in doing so. I don't doubt their teaching skills, but assuming students to be good or average based in their score in academics is unfair. All students are skilled in something or the other I believe. I score fair in academics and also represent our college at sports.
- This is not my voice but many students would appreciate teachers considering the overall growth of students rather than just a skill-set that is useful in getting a good job.
- everything is good
