DES

The Deccan Education Society (DES), Pune is one of the oldest and renowned educational societies in India, with over 141 years of dedicated service to the nation in the field of education. DES was founded in 1884 by eminent national personalities like Lokmanya Tilak and Gopal Ganesh Agarkar. The DES at present has 60 educational institutions from pre-primary stage to post graduation and research levels in Arts, Science, Commerce, Management, Nursing, Physiotherapy etc. Our alumni include intellectuals, industrialists, politicians, defense personnels, litterateurs and sports persons of highest caliber who have rendered valuable services to the Nation.

Kirti College

D.E. Society started Kirti College in 1954 at Mumbai. Over the years Kirti College has endeavored to cater to the needs of students coming from the underprivileged and marginalized sections of Indian society. The College is affiliated to the University of Mumbai and has the phalanx of virtuoso academicians and teachers who are engaged in pursuing Deccan Education Society's goal of 'Knowledge is Power'. At present the college offers undergraduate programmes in all the three faculties and post graduate programmes in science faculty. College's relentless service to the community, maintaining the standard of educational system and audacious working tradition has resulted in achieving NAAC's 'A' grade thrice, becoming 'Best College' of University of Mumbai, being surveyed as 'one of the top 50 colleges in the country' by India Today Magazine and in receiving FIST Programmed of Ministry of Science and Technology, Government of India. Since 2022-23, the college has been autonomous and was awarded ₹5 crores under the PM-USHA scheme.

Departments

The Kirti College was one of the first 8 colleges affiliated with the University of Mumbai, to start **Department of Computer Science** in 1999. The college has since expanded its technology-related offerings with the addition of the **Department of Information Technology** in 2001 and the **Department of Data Science** in 2021. These departments collectively offer a comprehensive range of undergraduate (UG) and postgraduate (PG) courses, designed to prepare students for careers in the software industry and for further research. The Department of Computer Science also provides a Ph.D. program for advanced research.

Introduction

In the rapidly evolving landscape of technology, soft computing has emerged as a pivotal approach to addressing complex real-world problems. Its ability to handle imprecision, uncertainty, and partial truth has opened new avenues across diverse disciplines. This theme underscores the transformative potential of soft computing when combined with multidisciplinary research. Bridging boundaries between disciplines will not only advance theoretical knowledge but also lead to practical solutions for contemporary global challenges.

Conference's Objective

The primary objective of this initiative is to explore the integration of soft computing with diverse fields. By fostering collaboration across various domains, we aim to enhance problem-solving capabilities and promote sustainable development. This initiative seeks to enrich academic research and practical applications.

For Whom

The Conference will add immense value to all category delegates:

- Academicians
- Research Scholars
- Industry Delegates
- Students
